

TIRE INDUSTRY

INSPECTION AREA

We develop new automations based on the needs presented in the production lines. Our hot stamping marking robot is a stamping solution designed to be flexible and simplify tire marking, capable of adapting to the wide range of tire sizes / profiles on the market.

Applications:

- **Hot stamp marking system:** Compact robotic stamping solution, configurable for multiple colors /shapes.
- **Tube + Flap positioning station:** This machine has been designed for handling specific large tires, as well as stacking and unstacking.
- **Tire palletizing robot:** complete palletizing equipment fully customizable to specific needs.
- **Tire depalletizing robot:** from container to conveyor belt in unit form.
